

NDi is a Verified Service-Disabled Veteran Owned Small Business (SDVOSB)

Capabilities Statement (Overview)

Network Designs, Inc. (NDi) provides secure remote access communications solutions for critical information; confronts cyber security challenges, both domestically and internationally; builds and maintains device-agnostic applications; develops compelling communications; and provides information management services to support data-driven decision-making for our stakeholders.

We Design, Develop, and Deliver Resilient Solutions for the Modern Enterprise

Focus: NDi serves the US Federal, DoD, Civilian, and IC communities. Among our partners are large defense industrial companies, government prime contractors, OEMs, and niche technology companies. Our core competencies include Cyberspace Ops & Resiliency, Secure Comms & Networking, DevSecOps, Enterprise Apps, Data & Information Management, Digital Communications, and Strategic Marketing.

Expertise: NDi's capabilities combine creative minds with deep technical expertise. Our professionals integrate the right technologies and meet client objectives with their mastery of skills, experience, and certifications, along with industry-accepted frameworks, standards, and compliance requirements.

Trust: The NDi team is trusted as an essential partner for thought leadership, subject matter expertise, and experienced IT professionals. We aim to understand

our customers' missions from their perspective so that we can deliver certain results. We offer best-in-class interactions with stakeholders and have been successfully serving the government for over a quarter century.

Resilience: NDi's ability to adapt to constant change and harness opportunities for the benefit of our clients demonstrates our resilience. Through innovation, advanced processes, and continuous risk identification and mitigation, we ensure our clients remain mission-focused and capitalize on new opportunities.

Innovation: Our IT professionals use the principles of Design Thinking and the Scaled Agile Framework to address the dynamic challenges of an ever-changing digital world. Using cutting-edge technologies, tools, and techniques, we combine empathy, outside-the-box thinking, and rapid prototyping to maximize customer results.
