

We Design, Develop, and Deliver Resilient Solutions for the Modern Enterprise

We are innovators, problem solvers and technologists. Throughout our 30 years serving the Federal government, we have consistently transformed critical data into actionable information, usable solutions and valuable user experiences.

SERVICES

- Secure Communications & Networks**
CSfC | Transport & VDI | NOC/SOC Design/Build
- IT Service Management (ITSM)**
Incident Mgmt | Change Mgmt | Problem Mgmt | IT Helpdesk
- Infrastructure & Operations**
Maintenance & Support | System Administration | DR & COOP
- Enterprise Applications & DevSecOps**
Agile | Full Stack Development | CI/CD Pipelines
- Program Management**
PMI/PMBOK | Portfolio & Performance | ITIL & SAFe
- Strategic Communications & Web Management**
Federal Web Program Mgmt | Web Design/Development | Outreach
- Enterprise Content Management & Case Management**
Content & Case Governance | Data Governance | Data Analytics
- Cyberspace Operations & Resiliency**
Zero Trust Architecture | RMF | NOC/SOC Watchfloor Support

NDi is a Verified Service-Disabled Veteran Owned Small Business (SDVOSB) and Small Disadvantaged Business (SDB)

FAA MODERNIZATION & PUBLIC SAFETY

60,000

FAA personnel operate without system-imposed obstacles, supporting confident, time-sensitive decision-making.

Modernizing the FAA's digital infrastructure is a public safety mission at its core. NDi built a high-performance enterprise ecosystem that delivers safety-critical information without hesitation, ensuring guidance and alerts reach the field when they are needed most.

Each year the system processes more than

8 million & **14.5 million**
safety documents high-priority messages

DOJ ENTERPRISE RELIABILITY & SECURITY

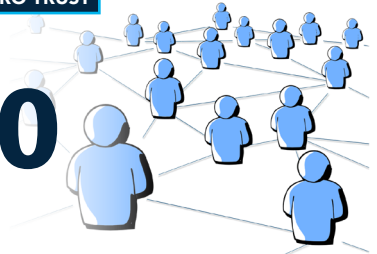

NDi provides the dependable, secure IT backbone that DOJ components rely on to keep the justice system functioning under the weight of complex investigations, urgent casework, and high-stakes enforcement operations. DOJ personnel operate on infrastructure designed to stay stable even in moments of intense demand, ensuring that critical systems are there the instant they're needed.

MONITORING AND RESPONSE

DOD CLASSIFIED MOBILITY & ZERO TRUST

150,000
GLOBAL USERS

NDi's NSA-approved Commercial Solutions for Classified (CSfC) remove the long-standing dependence on fixed facilities for accessing classified information, replacing it with secure, location-independent connectivity that keeps mission teams aligned wherever they operate.

NDi and AI

NDi uses AI and ML techniques to help federal organizations extract insight from complex data environments. Across DOJ and FAA missions and through AI CoE-led pilots, we apply AI-assisted analytics, such as anomaly detection, predictive trends, and NLP, to improve operational awareness and decision-making, with strong emphasis on governance and HITL oversight.

DOJ ENTERPRISE APPLICATION AND MODERNIZATION

NDi is the prime contractor for DOJ EOIR's Software Development & Support Services (SD&S), delivering enterprise application sustainment and modernization for EOIR's mission systems and public-facing services. NDi operates EOIR's application portfolio at scale:

50,000+ users supported
sustaining **25** authenticated EOIR applications
5 public websites
2,000-300,000 sessions per day

NDi's spin-off, RAVEN Secure Networks, introduces its advanced secure communications solutions designed to provide access to classified-level data over commercial and public infrastructure.
